WE BASE OUR SOLUTIONS ON A HIGH LEVEL OF TESTED PROFESSIONALISM AND AN INNOVATIVE APPROACH

WO acts as turnkey supplier and subcontractor with specialized competencies and do business both with the public segment and privately held companies.

We base our solutions on a high level of tested professionalism and an innovative approach. We have the will and the ability to solve classical solutions and demanding and complex special solutions.

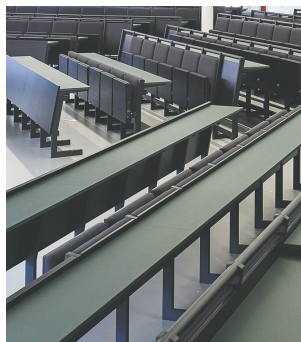

PERFECT THE FIRST TIME IS ALL ABOUT TRUST

We work closely with designers and architects to make their visions and ideas for design and function come true. It is a great obligation to deliver perfect solutions "first time."

We ensure that we match the idea and vision as well as deliver details that match the highest standards. We always strive to make the everyday use of the fixtures and furniture as comfortable and convenient for the users as possible.

We always document our order items via 3D drawings executed in Auto CAD or Solid Works. We can design the very best within our craftsmanship when it comes to presenting a committed and professionally strong crew.

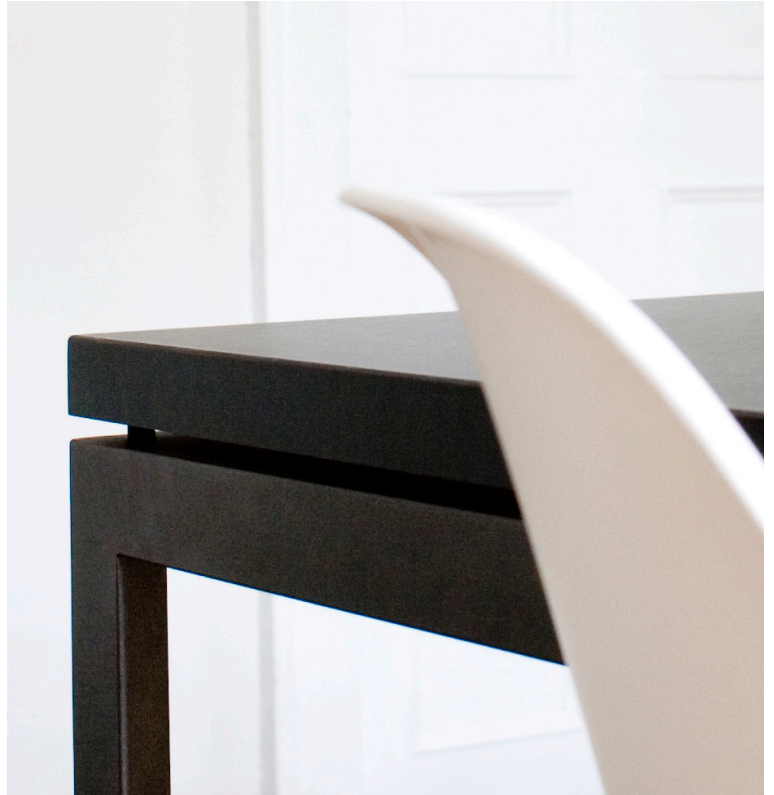

We have a permanent team of own installers who are used to solving the last part of the task when it suits the customer.

Made to measure

RECOGNIZED SUPPLIER WITH SPECIAL SKILLS

For decades, WO has contributed to developing specially designed solutions for our customers. Today, our production is mainly concentrated around items coated with linoleum, with our patented edge solution often used.

LET YOUR IMAGINATION RUN WILD

The high-quality finish and aesthetic design solution of linoleum edging ensure a wide diversity of potential application areas.

This means that ideas and innovation in the use of linoleum can now run wild.

Edge profiles

PATENTED KNOW-HOW

Architects and designers have for many years harboured a wish to be able to finish linoleum products in a harmonious way using linoleum on tops, undersides and edges.

This lead us to develop an innovative way of producing linoleum edging which is now patented internationally.

LINOLEUM EDGING

WO's linoleum edging can be used to achieve a harmonious and high-quality design finish which elevates any linoleum covered material. The process can even be industrialised, and this can often be done on existing machines!

This means that our edging is a future oriented solution which will be ground breaking in the application of linoleum.

PRODUCT customized fixtures, shelving and conference tables

DESIGNER Sevil Peach (UK)

FINISH oak veneer, concrete and Desktop linoleum

Lundbeck

MINIMALIST DESIGN WITH FOCUS ON MATERIALS - AND A UNIQUE COOPERATION

The Danish pharmaceutical company Lundbeck wanted to create a unique work place for their employees by a simple and quality-conscious office interior.

WO and RH Architects, with designer Bo Ramlyng, took the challenge. The solution was two very unique furniture in the form of height adjustable end wall desk and a storage, both made in Desktop linoleum.
